**TOPICAL ANESTHETIC CONSENT**

Some patients experience mild to moderate discomfort during the laser treatments, and for this reason we offer the use of a topical anesthetic cream. In some instances, the cream may cause a temporary local irritation in individuals who are sensitive to the active ingredients. Although very rare, other more serious side effects can occur. People with a known sensitivity to local anesthetics (Benzocaine, Lidocaine, Tetracaine) should not use this product. If you have been diagnosed with a cardiac or liver condition, take cardiac medication, or are currently pregnant or breastfeeding you should not use this product. This product will not be applied to large surface areas or multiple body sections during a single procedure (or within a 24hr period).

**I AM CHOOSING TO USE A TOPICAL ANESTHETIC FOR MY LIGHT/LASER TREATMENT, I AM AWARE THERE IS A FEE OF \$15.00 PER AREA APPLIED. I HAVE NO KNOWN ALLERGIES/SENSITIVITY TO BENZOCAINE, LIDOCAINE, TETRACAINE. I UNDERSTAND THE POTENTIAL RISKS AND I HAVE INFORMED THE LASER CENTER OF MY CURRENT MEDICAL CONDITIONS AND/OR MEDICATIONS.**
